DETAILED ACTION

Drawings

The drawings are objected to because the lines and reference characters are not uniformly thick and well-defined as required by 37 CFR 1.84(I). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 23, 24, 29 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3747

In claims 23 and 30, there is no antecedent for "the counter value".

In claim 29, there is no antecedent for "the predetermined target start time".

Allowable Subject Matter

Claims 23, 24, 29 and 30 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 1-22 and 25-28 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or suggest determining whether an accumulated number of delayed starts is greater than a reference value and stopping fuel injection for a predetermined number of engine cycles.

Conclusion

The starting control systems made of record and not relied upon are considered pertinent to applicant's disclosure.
